# Mathematics

Date 8 August 2026 Duration 2h 30m Paper ref. EB-MATH-A-2026-014

**You will need**

Formula and statistical tables booklet, scientific or graphical calculator, ruler, pencil for diagrams.

**125**

Total marks

## Before you start

- Write in **black pen**. Pencil is fine for graphs, diagrams and sketches — keep it dark enough to read (HB or B).
- Fill in your name, centre number and candidate number at the top of this page.
- Answer every question in the space given — *there's usually more room than you'll need.*
- Label multi-part answers clearly so the examiner can follow which part you're answering.

## About this paper

- You'll find **18** questions on this paper, worth **125** marks in total.
- The mark allocation for each question is printed in brackets alongside it — use it to judge your pace.
- A calculator is permitted, but it must not perform symbolic algebra, calculus, or hold retrievable formulae.
- Give answers to three significant figures unless the question tells you otherwise.

## Exam technique

- Read each question fully before you start writing — the last line often changes what's being asked.
- Show your working throughout. A correct answer with no method may not earn full marks.
- Attempt every question — a partial answer can still pick up method marks.
- Leave time at the end to check your answers, especially arithmetic and units.
