(a) Find the first 4 terms, in ascending powers of $x$, of the binomial expansion of

$$(2 - 5x)^8$$

giving each term in simplest form.

**(4)**

This expansion is to be used to find an approximation for $2.05^8$

(b) State the value of $x$ that should be used.

(*There is no need to carry out this calculation.*)

**(1)**
