

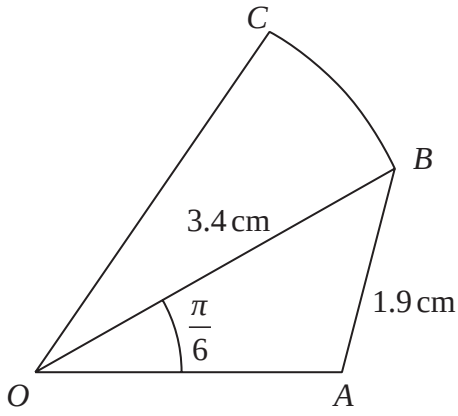

Figure 1

Figure 1 shows a sketch of a design for a badge.
The design consists of a triangle *OAB* joined to a sector *OBC* of a circle with centre *O*
In the design

- $OB = 3.4\,\text{cm}$
- $AB = 1.9\,\text{cm}$
- angle $AOB = \frac{\pi}{6}$ radians
- angle $OAB > \frac{\pi}{2}$ radians

Making your method clear,

(a) find the size of angle *OAB*, giving your answer in radians to 4 significant figures,

(3)

(b) find the area of triangle *OAB*, in cm^2, giving your answer to 3 significant figures.

(2)

Given that the ratio of the area of sector *OBC* to the area of triangle *OAB* is 3 : 2

(c) show that angle *BOC* is 0.462 radians to 3 significant figures.

(3)

(d) Hence find the perimeter of the badge, in cm, to the nearest integer.

(5)
